

FORECASTING THE 2020 US PRESIDENTIAL ELECTIONS.

Cesar Y. Villarreal Guzman

29 October 2020

Abstract

In this paper we estimate Joe Biden to win the majority of votes for the 2020 presidential election.

Keywords: Forecasting; US 2020 Election; Multilevel Regression with Post-Stratification

R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0   Min.   : 2.00
## 1st Qu.:12.0   1st Qu.: 26.00
##  Median :15.0   Median : 36.00
##   Mean  :15.4   Mean    : 42.98
## 3rd Qu.:19.0   3rd Qu.: 56.00
##   Max.  :25.0   Max.    :120.00
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
